

GREAT RESULTS AT CANDLARIA IN NEW MILL

Success of Ore Treatment Has
Been Most Gratifying to
Many Stockholders

Officials of the Candalaria Silver Mines are shortly expected to inform their stockholders of the results of mill operations, which began on October 1 last. Since the company began operation of this new adjunct to the property, a large amount of ore has been treated, although the operation has not yet reached capacity. These operations were conducted upon a basis at the start of around 200 tons daily, and have been increased from time to time until at present the operation is believed to be upon a basis of 300 tons.

The success of this mill has been gratifying to stockholders, as well as the officials of the company, says Financial News. When the mill was started the recovery was at about 12 ounces of silver to the ton and these now have been increased to about 17 ounces. At present the company is getting something like 4000 ounces of silver daily. There has been no record as to whether or not shipments have been made, but it has been indirectly learned that the first clean up of the mill will be made at the first of the coming month.

The initial recovery of 12 ounces of silver to the ton was just about what the management had expected, and they did not look for much of an increase over that amount. The ability to get the recovery value to the present level of from 17 to 18 ounces to the ton has been through the development work being done on the various properties controlled by the Candalaria Silver Mines. The most encouraging results were those that have been uncovered on the Northern Belle mine, where below the 1000 level high grade ore has been developed. The samples taken showed a value up to \$115 to the ton. On the Lucky Hill property high grade ore has been uncovered and samples showed values up to \$90 per ton. This ore, on both properties, was found in large veins running from nine to 12 feet wide, and through this it is believed that the company operation did not run into a small amount but that there is quantity as well as quality. Notwithstanding the continuing

operation of the mill from the time of its start and the increase in capacity, regardless of the high grade ore that has been uncovered, disregarding the fact that mill operation has resulted in 4000 ounces of silver being daily piled up against the early shipments, which means a gross earning of at least 50 cents a share on the outstanding stock annually, and belief that this will soon result in a dividend declaration, the shares of this company have steadily maintained a level in the market, considered by many to be little more than the price of a prospect.

Candalaria Silver Mines has enough ore in reserve despite the new ore uncovered to keep the mill busy at the current rate for more than six years. The present market for the stock is not one that concerns the affairs of the company, but is rather one that is due to the condition of the general situation.

HEAVY PRODUCTION MADE ON COMSTOCKS

As the open pits grow larger and larger on the hillside to the west of Gold Hill by the mining operations there, it brings to mind the fact that historic ground is now being given the final test. It was on this site that men mined in the early days whose names are famed in Comstock lore and great fortunes were wrested in fabulous rich ore, says Virginia Chronicle. The present enterprise is opening great bodies of low grade material that is feeding a monster mill and more ore is being treated in a single month than was possible in a year with a dozen mills in the early days. It is evident that the new mining boom is to sweep the mineral resources of the south end clean.

SHOT AT HOME OF HIS FATHER-IN-LAW

John Churchill Jr. of Death is at the Shaw hospital recovering from the effects of gunshot wounds inflicted at the home of William Duval, his father-in-law. The shot was fired by Duval at a distance of about 20 feet, the entire charge taking Churchill in the breast and neck. Of the 45 bullets which lodged in Churchill's body, one passed through the windpipe and out through his lip. As the gunshot was a 410 gauge shotgun the wounds will not be fatal, says the Elko Independent. The shooting followed a quarrel over property, it is said.

Somewhere the government's pursuit of the Ku Klux Klan seems comic.

CARSON POSTOFFICE JOB GOES TO DAN MORTON

The nomination of Daniel Morton as postmaster at Carson City, which was held up at the request of certain Ormsby county republicans, went to the senate Nov. 27, according to copies of the Congressional Record. Morton, who was formerly county clerk of Ormsby county, was selected by Congressman Arentz for the appointment. Then Senator Oddie was requested to order a delay in the matter pending an investigation, which he did as a sub-committee of one of the committee on postoffice and post roads, charged with investigating postal appointments in certain western states, according to the Gazette. It is considered probable now that Morton's nomination will be confirmed. The appointment rested between Morton and A. B. Karns.

Lady Astor missed the enjoyment of private life when she was elected to parliament by a bare margin.

Policies will never be dead as long there is a tariff bill to fight over.

If you think you had nothing to be thankful for think of Lloyd George.

The man who waits for things to turn up will never turn up at the right moment himself.

Every Woman

—that bakes with
Calumet—and there
are millions of them—
has learned three im-
portant baking facts.

First; that she never has
any failures, which means
no loss of time and ma-
terial.

Second; that her bakings
are always pure and
wholesome, which goes
a long way toward perfect
health.

Third; that the greater
than usual leavening
strength of Calumet
stands for economy be-
cause she uses less.

CALUMET

The Economy BAKING POWDER

—sales are 150% greater than that of
any other brand.

A pound can of Calumet contains full 16 ounces. Some
baking powders come in 12 ounce instead of 16 ounce
cans. Be sure you get a pound when you want it.

THE WORLD'S GREATEST BAKING POWDER

Batteries and Furs

SAFETY and convenience
prompt a woman to put her
furs in storage for the Summer—if
she doesn't wear them.

The same reasons impel a motorist
to put his battery in storage for the
Winter—if he lays up his car.

An idle battery in an idle car deteriorates
rapidly—especially in cold weather. And
there's always danger of freezing, too.

We'll not only "store" your battery this
Winter but return it to you practically
new in the Spring. You'll be aston-
ished how little it costs you.

Winter's just around the corner. See us
about your battery now.
